

Brief CV

Name	Honglin Gao	Gender	male	
Title (Pro./Dr.)	Associate Pro./Dr.	Country	China	
Phone Number		University Email		
University/Department	Yunnan University / School of Materials Science and Engineering			
Personal Web Sites	-			
Research Area	Photocatalysis applied in energy and environmental field			

Brief introduction of your research experience:

I received My Master's degree from the Department of Materials Science and Engineering at Yunnan University in 2007 and PhD degree in Materials Science from Nanjing University in 2014.

My current research interests are focused on Photocatalysis water splitting for generation of hydrogen, Photocatalysts for environmental purification, Synthesis and characterization of new functional materials. I have coauthored about 20 peer-reviewed papers with around 200 citations.

I Has hosted and participated in the National Natural Science Foundation, "973", and other scientific research projects amounted to more than 10.
